INTRODUCTION: In context of the fundamental question of Immanuel KANT “**What is the human?**” is proposed conception about individual-natural-social, reflected in an **integral anthropology (IA)**, i.e. interaction *human-nature-society* [1]. Example for IA-research on resident-houses: Tenants-interaction with micro-environment/ house-apartment, administration/ lessors/ inhabitant. RH-reports about social-juridical-medical problems are given [2]. RH-problems are related to human obligations/I. KANT [3], human-rights/I. KUCURADI [4], experimental ethics/Ch. LUETGE et-al.[5], health-medical personnel/R. PEGORARO [6].

OBSERVATIONS: Conflicts between tenants-lessors include philosophical-juridical-medical-psychological-social-economic factors. In Europe are living millions citizens in RH: Germany-54.3%/Austria-30.2%/France-25.3%/GB-24.1%/Italy-12.9%/Slovenia-4.5%. Situation of RH-Munich demonstrate *contradiction to human rights* (CHARTA of EU, art. 1-8/25-26/33-35). Conflicts lead to dangerous *health disturbances* – angio-cardiac (arrhythmia/arterial-hypertension), psycho-neurological (anxiety-insomnia, etc.) & others, activation of chronic-diseases by pathophysiological and psychopathological reactions. Also micro-environment (defect doors-windows/air-currents induce respiratory-diseases, defect illumination – accidents/neuro-orthopedic diseases, etc.).

On example of conflicts tenants-lessors in Munich is reflected *impossible situation in German-RH*: After 47 years annihilation of RH-contract (tenant-woman 74 years); nearly 3 years lessor tries to eliminate 2 scientists from RH, living-working 40/50 years, using totalitarian-methods; also tenant 90 years with dementia[2,7]. Blind senior (90 years) must quit immediately RH before Christmas-2018 after 10years (by letter from employer),etc. [7: SZ/MM/tz/Bild].

CONCLUSION: Evident *human dignity* of many tenants is **not** of importance for immoral lessors and justice. Socio-economic conflicts lead to dangerous psychosomatic diseases. RH need *new juridical regulation*, strong health&financial control of RH supporting **UNO-Agenda21** for better health-ecology-economy, etc. on global level.
